

Key Features:

Integrated Load Cell Technology

Accurately measures coffee grounds in real time - a streamlined process that grinds directly into the portafilter for precise measurements without extra steps.

Cafe Quality at Home

A home grinder for Moka pot, espresso, and filter brews so your morning coffee just leveled up.

Intuitive Color-Changing Display

Color-changing screen based off of grind type with endless grinding combinations.

Sleek Design, Premium Build

Elevate your kitchen aesthetic with the All-Ground Sense's sleek design and premium build. Its compact size seamlessly integrates into any space while exuding elegance and sophistication.

Dark-T® Burrs

64mm burrs, coated in titanium, aluminum, carbon, and nitrogen, ensures durability that exceeds standard burrs by 5 times, as verified in laboratory tests.

Description:

Introducing the ultimate precision grinding experience for coffee enthusiasts - the AllGround Sense with integrated scale technology. Elevate your brewing ritual to new heights with this cutting-edge grinder designed to cater to Moka Pot, filter brews, and espresso aficionados, all while offering unparalleled convenience and accuracy.

The AllGround Sense revolutionizes your coffee routine by seamlessly integrating load cell technology. This groundbreaking feature means you can say goodbye to cumbersome separate scales and hello to real-time, precise weighing directly within the grinding process. No more guesswork; simply set your desired weight.
