

How to Reconnect the Power Cord

Suggested Tools

Phillips-head
screwdriver
(approx. 6mm)

Remove the screws from the cap and the left-hand cover and carefully slide the cover up and off.

Locate the plug that connects to the power supply under the counter and re-seat it in the socket.

Check for LED's to light-up on the PCB and wait 3-5 minutes for the Poursteady to completely re-boot.

Replace the cover and cap and the screws securing them.

POURSTEADY

Make coffee.
