Energy efficiency

Setting:

- **Automatic:** allows the user to associate up to 6 daily time frames.
- **Manual:** allows the user to turn the machine or the individual boilers on and off manually.

Two programmable modes:

- **Stand-by:** low power consumption condition, compliant with the ErP Directive (2009/125/EC).
- **Eco:** keeps the machine on, but at a reduced temperature for quick start-up.

For both, the user can enable the Energy Saving function, which automatically turns the machine off after the set time.
